The Democrats of Springfield - or, rather, that small portion of them who assembled in the Grand Opera House, Friday evening-have nominated a full list of candidates for the several city offices to be filled on the first Monday of April.

THE DEMOCRATIC TICKET.

J. J. Smith, Esq., for many years a magistrate, through the sufferance or neglect, laziness or indifference of Republic cans, is the Democratic candidate for the office of Mayor. We do not need to give the history or portray the character of this man. He is too well-known to require any advertising from us. He represents the Bummer, whisky elements of the Democratic party, and his nomination makes a Republican majority of 1,500 quite possible if not probable; for Mr. Smith is the bot before the Congregational club in New kind of a man who ought to be beaten, on York Monday evening, "is that the wagegeneral principles. Were he a Republican, and had he managed to get the Republican nomination, he would even then deserve detent.

Mr. William L. O'Brien, the man nominsted for the position of Marshal, also represents the saloon element of his party. and himself keeps a saloon, and that is all of famine. If times are good, just beyond we need to say to induce all really good it: if times are bad, just within it. Chriscitizens who wish to see the laws of the State and the ordinances of the city enforced, to vote against him-and for honest, faithful Billy Hughes, his Republican opponent. The nomination of O'Brien is disgraceful to the Democracy and to the

John L. Zimmerman, Esq., the gentleman nominated to succeed F. M. Hagan, Esq., as City Solicitor, is a good man-an able lawyer, a gentleman, honest, conscientious and capable and would be worthy of the suffrages of the people if he were not on the Democratic ticket, and Mr. Augustus N. Summers, his equal in all respects-and quite possibly his superior in some-had not first been nominated by the Republicans. As it is, poor Tray Zimmerman is in a bad crowd and will share its fate.

On no other than the night of an up lucky Friday could the Democrats have been so crazy as to nominate any other man than Billy Mills as their candidate for the position of Street Commissioner. He has been elected for several terms by the general consent of Republicans as well as Democrats, and no Republican that has ever been brought out against him could ever beat him. Had he been nominated this year many Republicans would have supported him. We are really very grateful to the Democrats for not nominating him, and Mr. Mills ought to be, too, for we think we should have beaten him this time.

Indeed, the ticket, as it stands, is a first rate one-fo beat! And it will be beaten by an exceptional Republican majority. For the Republicans have a good, clean, strong ticket, representing the popular will and the best men in their party-a ticket nominated fairly, without the use of corrupt means, composed of men who are honest and capable-who have no entangling alliances with the disorderly elements of our city, and who will faithfully and honestly entorce the laws and promote the peace and good order of the city.

It seems to us, now, that no good citizen can, or has a right, to waste his vote, on Monday, the 6th of April. Either James Constantine-fatally.

P. Goodwin, the Republican candidate, or "Jake" Smith, the Democratic candidate will be elected. Mr. Thompson, the Prohibition candidate, a gentleman and a Christian, and a man of ability and sensewithout reproach or stain-will receive but a few scores of votes, at most, and the only possible result of a vote for him is to weaken the Republicans and promote the prospects of the Bummers and Whisky men. The place for true Reformers to work is at home and they should put their efforts and their ballots where they will count! Mr. Thompson, himself, should vote for Goodwin, and we half believe he

The Republican campaign should now be opened at once and should be prosecuted with vigor and vigilance and the work should be kept up until six o'clock on election day. And every good citizen should fall into the Republican ranks!

The immense amount of money coming to certain American families from the Lawrence-Townley estate in Englandsaid to be worth \$500,000,000—has been the theme of newspaper accounts in this country for many a year. The stories are similar to those which make mention of other family names, and are hopping up, in some portion of the land, continually. Recently it has been stated, with a great flourish of headings, that Mrs. Stephen S. Brown, of Gowanda, New York, "had fallen heir to \$40,000,000," a portion of the "estate" named. Simultaneously with this announcement comes the statement that the claimants of the Anneka Jans estate, with new recruits, are on the warpath, with the idea of "scooping" the Trinity church property in New York. But a correspondent of the Rochester Democrat and Chronicle writes from Olean, New York, to the effect that the story about Mrs. Brown "is false in every particular." The original publication very naturally set the American heirs to English estates and to "unclaimed balances in the Bank of England" into a great flurry of excitement and incited them to renewed effort. The fact is, there are very few "unclaimed balances" in the "Bank of England," and they are not in large amounts. As to the Lawrence-Townley estate, the New York Evening Post, whose editor has investigated the matter thoroughly, has an exhaustive article in which it quotes from the English and American genealogical records. These records show that there are no American heirs entitled to a farthing. This fact should warn those who have "Great Expectations" of fortunes in England, and who are disposed to spend noney on a certain class of lawyers who tatten themselves on people of this class, to move very cautiously, if at all, in the direction of an investment quite likely to

bottom of much of the present crime, agony and despair," said Dr. Lyman Abis absolutely necessary to enable him to live. The rate of wages seems to be dethe workman can live for less, it would seem, he gets less. The toiler is all the time more or less near to the border line tianity has revolutionized the world politically, but not industriously. 'Do unto others as you would have done unto you.' Over how many factories and stores and business houses could such a legend be inscribed without being a pitiable mockery. If to deny the fatherhood of God is to be an infidel, what would you call one who denies the brotherhood of man? In the present relation of employer to employe can there be said to be any brotherhood of man? It is the duty of Christianity to revolutionize our present industrial system. Therein lies, in a great neasure, a helping response to the bitter ery." It would be a mighty good thing if Christianity would try its hand in this matter. It, if genuine and properly administered, would do justice to all parties and assist, largely, in the solution of a supremely important problem.

A Western man invested heavily in lottery tickets, and some one who knew of his weakness sent him an announcement that he had drawn a prize and enclosed a draft for \$1,000,000. It is stated that the discovery that the draft was bogus unsettled the man's mind. We hardly believe it. A man who has any mind doesn't buy lottery tickets.

Usually develops in early life, and is a peculiar morbid condition of the system, usually affecting the glands, often resulting in swellings, enlarged joints, abscesses, thickening of the lips, enlarged neck, sore eyes. A scrofulous condition is often hereditary, but bad diet, too free use of fat meats, bad air, want of sunshine and nourishing food will induce it. Some people are troubled with scrofulous swelling of the glands, and with ulcers and kernels, which may cause very little pain; others may have inward scrofula, scrofula of the lungs, scrofula of the spleen, scrofula of the kidneys, and scrofula of the bones. BUR-DOCK BLOOD BITTERS will drive away any case of scrofula and not to appear in another place, for their action on the blood and bowels will carry the disease entirely from the body.

# STOP US! CATARRH

CATARRH IS A DANGEROUS DISEASE, yet it can be cured by the use of our Catarth Specific.

Thousands suffer without knowing the nature of this almost universal complaint. It is an inflammation or ulceration of the lighty membrane of the usual passages. There are several control of Catarth with with a lateral complaint. The most common kind is characterrarieties of Catarrh, with widely different symptoms. The most common kind is characterized by an exc saive accretion of mucus or matter in the nasal passages, which must either be blown from the nose, or drop back behind the palate, or is hawked or souffed backward to

he throat.

Other indications are hawking, spitting, weak and inflamed eyes, frequent soreness of the throat, often ringing or roaring or other noises in the ears, more or less impairment of the hearing, loss of smell, memory impaired, dullness and dizziness of the head, and dryness and heat of the nose.

All persons thus affected take cold easily. The breath sometimes reveals to all around the corruption within, while the patient often loses all sense of smell. The disease advances corruption within, while the patient often loses all sense of smell. The disease advances coverily, until pain in the chest, lungs or bowels, startles him, be backs and coughs, has dyspepsis, liver complaint, and is urged by his doctor to take this or that; perhaps, cod liver oil is prescribed. Perfectly ridiculous! The foul ulcers in the head cannot be reached by pouring such stuff into the poor, jaded stomach. The patient becomes nervous; the voice harsh and unnatural; he feels disheartened; memory loses its power; judgment her zeal; gloomy torebodings hang overhead; hundreds, yes thousands, in such circumstances, feel that to die would be a relief, and many even do cut the thread of life to end their sorrows.

### THOUSANDS ARE DYING

in early life, with consumption, who can look back a few years—perhaps only months when it was Catarrh. Neglected when a cure is possible, very soon it will transform the features of health and youth into the dark, pallid appearance; while the backing cough, the excess of blood gushing from the lungs, or night sweats, all significantly proclaim it is too late; and thus a neglected Catarrh ends in the consumptive's grave.

### NASAL CATARRH.

Sometimes the disease only affects the membranes lining the nasal passages, and they may be easily reached and cured by simple means. But when it is located in the "frontal sinus," or in the "posterior snares," or if it has entered the "Eustachian tubes," and is injuring the ears, nothing but finely medicated vapor can effectually reach it and destroy it. And certainly after it has affected the throat and bronchial tubes, as all well-read physicians will apply the care problem of the property of the prope readily attest, nothing can be relied on to effect a permanent cure but the inhalation of properly medicated vapor. In the same manner that we breathe a common air we can inhale and breath a medic-ted air; and it is perfectly simple, any one can see, thus to treat a disease of the throat, bronchial tubes and luags. How much better this method by which remedies are conveyed directly to the seat of the disease than to resort to the uncertain and too frequently mischievous action of medicines taken into the stomach.

### THE COLD AIR INHALING BALM.

This part of my treatment I regard as very important, especially in warding off colds (which is helf the battle), and in relieving the head and lungs while under their effects. The balm is composed of several kinds of gums, baisams, firs and essential oils which are sepparately used by the best obysicians in treating throat, bronchial and lung diseases. These I have combined and concentrated their virtues, which by the inhaling process, are drawn through the various passages of the head and respiratory organs, reaching and healing every irritated spot. If used when cold first make its appearance—which usually begins by irritation of the mucus lining of the nose, and a sneeze, which is nature's emphatic warning—it will invariably chick it; and by producing a quicker circulation, and by throwing the blood to the surface, the bad effects of a cold are warded off. It is pleasant to use and almost instant in its effects.

### SOME BAD SYMPTOMS.

The long continued correction of the air that is breathed passing over the foul matter in the nasal passages poisons the lungs and from thence the blood. The morbid matter that is swallowed during sieep passes into the stomach, enfecties the digestion, vittates the secretions and pollutes the very tountains of life. The patient becomes feverish occasionally, there is less buoyancy of spirits, the appetite is often fickly, the bead less clear, it is difficult to keep the energies up to the old standard, and often without knowing why, he is conscious that he is not as well all the time as he used to be. These symptoms indicate that the vital organs are becoming impaired so that they can not perform their natural healthy functions. Our constitutional treatment is devised to assist nature in removing all poisonous material from the system and to neutralize and counteract its baneful effects on the vital organs and on the

AMONG WOMEN Catarrh is very common. The decree of fashion compel women to go from the dry atmosphere of turnace-heated houses into the open air, with the head poorly protected. Many suffer keenly from be exhibits and difficulties of the throat and lungs.

TEACHERS IN OUR SCHOOLS are greatly subject to this fearful malady. Confinement in close, iil-restillated school-rooms; the over-heated atmosphere, charged with the steaming poison exuding from the bodies of the not always over-clean children, breed this dis-

LAWYERS IN THE COURT ROOM and Judges on the bench, from the same general

MINISTERS OF THE GOSPEL, after leaving the pulpit overheated with the strain of their mental and physical effort, neglect sufficient precaution and cold is the result. This neglect opens the way to Catarrh, and to a possible loss of voice. I have suffered so keenly myself that I can not urge upon public speakers too strongly the necessity of removing this
